

MRC-988 Blow Torch

READ CAREFULLY THE INSTRUCTIONS BEFORE USING THE APPLIANCE. KEEP THE INSTRUCTION FOR FUTURE USE.

Gas Refilling

- Prior to filling with purified butane, make sure the gas refill valve is tight.
- Use only high quality purified butane gas.
- Shake gas container a few times to warm fuel up.
- Move Flame Adjustment Slide (2) to "-" position.(Fig.A).
- Insert the container nozzle vertically down into the gas refill valve. (Fig.B).
- Use a pumping action for best result.

After fueling, allow a few minutes for gas to stabilize.

Warning: The gas will escape while the gas tank is filled with gas at full. Don't try to refill more gas in.

Igniting

- Move Flame Adjustment Slide(2) to "+" position. (Fig.C).
- Push up the Lock Switch (3) until it clicks in place (Fig.D). For safety reasons, the ignitor button will not depress unless lock switch (3) is locked in place!
- Press Ignitor Button (4). and the flame will ignite instantly (Fig.E).

Using Continuous flame feature

CAUTION: use extreme caution when flame is locked on as flame will be continuous and will not turn off until the Lock Switch (3) is MANUALLY disengaged.

- While holding down the Ignitor Button (4), push down the Lock Switch (3). (Fig.F)
- Release the Ignitor Button (4), the flame will remain on. (Fig.G)
- If flame lock switch is being activated (at lower position), press lock switch upward to shut off the gas flow.(Fig.H)

Flame Adjustment

- Adjust the flame length during use by moving the Flame Adjustment Slide (2). Don't make the flame too long as it will only wastes fuel and make the flame unstable.

At higher altitudes, torch may not operate on maximum flame length setting (with slide pushed all the way to "+").

For best results, adjust the slide to the mid-range between "+" and "-".

Turning off and Storage

- To turn the flame off, simply release ignitor button.
- When the flame is locked, please push the lock switch (3) up to turn off the flame. (Fig.H)
- Make sure that torch/tips are cool before storing or leaving unattended.

Warning

- Read carefully the instructions before using the appliance. Keep the instruction for future use.
- Operation outside or in a well-ventilated place.
- Use only Butane lighter fuel.
- Keep the torch and gas cartridge out of reach of children.
- Do not use an appliance which shows any damage.
- Butane is very flammable, handle with care.
- Refill the tank in a well-ventilated place, in a flame or ignition source free atmosphere, far from other persons. Do not smoke while replacing or refilling.
- Before refilling the device. Read the instructions printed on the gas cartridge.
- Always have a fire extinguisher near the torch and work area.
- Disassembling, modifying the torch or adding parts may be hazardous.
- Never attempt to repair the torch and never use unapproved fuels.
- Do not perforate or burn the gas cartridges even when they are empty.
- For environmental reasons the gas cartridges should be disposed in specific containers for subsequent recycling.
- Avoid breathing welding / soldering fumes. Use a ventilator to maintain good ventilation.
- Work only in a clean place, far from combustible or greased materials.
- Do not point the flame to any person or flammable materials
- Allow the appliance to cool down normally after using. Make sure that the appliance is shut down before storing.
- Warning! The flame is not highly visible in the sun.
- Do not store in temperatures over 40°C(104°F). Never leave the torch in direct sunlight or in areas where high temperatures are generated.
- Store the device vertically.
- Pay attention that the safety lock jumps to its original position after use.
- Keep the appliance away from grime. Be careful not to drop the gas torch while using, as it's the most frequent reason for malfunction.
- Caution: the flame guard could be very hot after using.
- In case that a gas leak (smell of gas), take the appliance outside to a well-ventilated place immediately, where the leak may be checked.
- Never check the leakage with flame but only with leak detection spray.
- Do not put an ignited appliance unattended at any time.

Parts Identifications

IMPORTANT: After 10 minutes of continuous use, be sure to shut down the torch for 5 minutes to prevent Flame Guard(1) damage or overheating.

Do not try to repair or disassemble any parts of the torch.

• Category: direct pressure butane. • Use purified butane gas. • Only use in well ventilated areas. • Consumption rate: 44g/hr (0.6KW) • Be sure flame is out after use. • Follow all instructions and warnings provided by manufacturer of appliance. • Flame guard may become very hot. • Keep away from children. • Recommend to refill the gas after using 15 minutes to make sure flame is in the good position.

size: WxH 297x210mm
